## CSCE 740 - Structural Testing Activity Name(s):

1. Draw a control-flow graph for the following program:

```
int search(string A[], int N, string what){
     int index = 0;
     if ((N == 1) && (A[0] == what)){
           return 0;
      } else if (N == 0){
           return -1;
      } else if (N > 1) {
           while(index < N) {</pre>
                 if (A[index] == what) {
                       return index;
                 } else
                       index++;
                 }
           }
     }
     return -1;
}
```

2. Write tests that provide statement, branch, and basic condition coverage over the code
